LFD259: Kubernetes for Developers

Philip Omoigui

Software Engineer
Lagos State, Nigeria

Summary

I'm a resourceful Software Engineer with extensive experience developing rich web applications. I'm well-versed in the technologies required from development to deployment. Comfortable building restful APIs in C#/Asp.Net as well as with NodeJs/ExpressJs.

I'm familiar with SQL, and ORMs such as Entity Framework/ Mongoose/Sequelize. NoSQL databases primarily work with MongoDB.

I'm familiar with Cloud-Native practices, tools, and architecture, and currently honing my Devops Engineering skills. I'm a critical thinker, a lifelong learner, and surprisingly quick at picking up new concepts.

Experience

Sterling Bank Plc
Senior Backend Engineer
February 2022 - Present (3 years 10 months)
Lagos, Nigeria

In over 60 years of operations, Sterling Bank (formerly NAL Bank) has evolved from the nation's pre-eminent investment banking institution to a fully-fledged commercial bank; and completed a merger with 4 other banks - Indo-Nigeria Merchant Bank, Magnum Trust Bank, NBM Bank and Trust Bank of Africa - as part of the 2006 consolidation of the Nigerian banking industry.

Responsibilities;

Enhanced team productivity by 30% by leveraging modern CI/CD platforms and tools, thereby eliminating manual deployment to the end user.

Deployed new features to the core banking system which reduced the turnaround processing time of 20k loan applications from 3 months to 48 hours.

Created an automated risk notification framework that takes the hassle of notifying users prior to their risk expiration, reducing manual work done by relationship managers by 80%

UCARD Innovations Inc.
Software Engineer (.Net)
July 2022 - October 2022 (4 months)
Lagos State, Nigeria

Innotelligent Technology and Consulting
Software Engineer
January 2021 - May 2022 (1 year 5 months)
Lagos, Nigeria

Architected and built a system with React and Asp.Net core that improved latency by 30% by periodically sending user webcam movement and behavioral analysis through a RabbitMQ message queue.

Automated deployments of releases with Azure DevOps to allow for continuous deployment and delivery to end-user in turn eliminating manual releases and improving team productivity by 50%.

Reduced user issue resolution time by 90% by automatically notifying support staff using email integration

Complustech Limited
Software Engineer
January 2020 - December 2020 (1 year)

Worked with an Agile team of software developers leveraging Node.js and the .Net stack to improve the operations of churches in Nigeria through a product called 'ChurchPlus'.

Improved the internal web applications performance by optimizing assets such as photos, and videos which improved the application speed by 35%.

REGNIFY
Software Engineer
January 2017 - December 2019 (3 years)
Lagos State, Nigeria

Education

Obafemi Awolowo University

Bachelor's degree, Accounting · (2015 - 2019)
